HUMAX EV CHARGING

About Humax

A journey of continuous innovation – since 1989

Since 1989, HUMAX has become a leading provider of mobility solutions, offering advanced technologies for global operators, including a robust mobility service and hub platform. Our commitment to ongoing R&D drives our position as a premium gateway developer.

Our mobility hub supports diverse solutions, from parking and shared mobility to smart buildings, fleet management, and EV charging for home and commercial use.

We partner with major vehicle brands for infotainment and IoT solutions in elder care and recycling management, and we develop recycling-focused content.

EV Charging Solution

Humax EV Charging

Empower your transition to electric mobility with Humax

Humax provides seamless and efficient commercial EV charging solutions tailored to your business. Benefit from ultra-fast charging (up to 22kW) and nationwide installation for a hassle-free experience.

Our innovative Monta-powered smart chargers include features such as RFID, Wi-Fi, and Ethernet connectivity. They are an ideal solution for apartment buildings, office blocks, retail spaces, and local authorities.

Plus, unlock new revenue streams with our scalable, UKCA/OZEV-compliant solutions. Provide customers and tenants with reliable charging while reaching your sustainability goals.

Make the switch to Humax today, and lead the charge into a sustainable future!

Seamless Installation

- Nationwide installation
- Dedicated post-installation support

Ultra-fast Charging

- Charging with up to 30 kW
- Universal Type 2 Socket

Smart Features

- Powered by Monta
- Integrated RFID, Wi-Fi & Ethernet

Proven Hardware

- UKCA, OZEV compliant
- Reliable and scalable

Advanced, scalable EV charging solutions designed for commercial needs

DC Chargers

30kW **DC**
Pole-stand & wall-mount

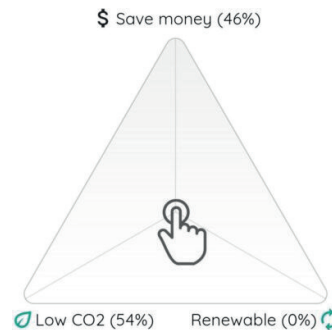

Powered by Monta

Save money or cut your CO2 footprint

Simply set your preference in the app and automatically charge your car the way you want to.

- » Prioritise renewable energy
- » Save money on electricity
- » Lower your CO2 emissions

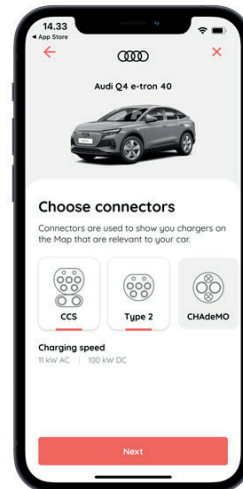

Connect to your car for greater insights

Thanks to Monta's partnership with Enode, it is now possible to integrate your car with the Monta system.

When you choose to integrate your car, you give our system access to information about your car, such as:

- » SoC (State of Charge)
- » Charging Rate
- » Scheduling
- » Charging Statistics

and much more!

Turn your EV charger into a profit centre

Make your charge point publicly available and earn money while sharing it. Switching to Public Mode will allow Monta users to find your charge point and charge at it. Bill at the price you set and receive payment via Monta Wallet.

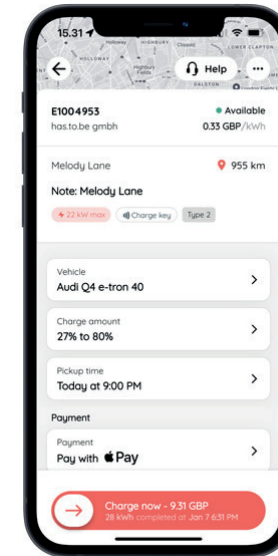

You can also:

- » Create a schedule to switch between Public and Private mode to suit your business needs.
- » Place a Monta sticker on your charge point so EV drivers can also charge without a Monta account or the app.

200,000 charge points across the UK and Europe at your fingertips

Connect to a super network of charge points across the UK and Europe. With Monta in your hand, you never need to worry about finding a place to plug in. Leave range anxiety behind and go where the mood takes you.

- » Get access to 200,000 public charge points
- » Seamless payment with multiple options
- » Easy navigation to available charge points

Need Help?

- » Monta offers 24/7 support to help make your travel experience as stress free as possible.
- » Immediate help is available via the Monta app if you ever find yourself stuck while trying to charge up.
- » Simply click the "Help" button and the support team will come to the rescue!

Unlock Revenue Potential

Turn your property into an EV charging destination

Unlock new revenue potential by transforming your property into a charging hub with our commercial EV solutions.

Create New Revenue Streams

Set your own rates and generate consistent income by offering paid EV charging services to residents and visitors.

Meet Sustainability Goals

Actively contribute to reducing greenhouse gas emissions, attract environmentally-conscious customers & support clean energy initiatives.

Scalable Solutions

Our commercial EV charging systems are designed to grow with your property's needs, ensuring you can easily expand as demand rises.

Receive Comprehensive Support

From installation to ongoing maintenance, our nationwide expert team ensures seamless setup and hassle-free operation, maximising your ROI.

Sectors we Power

EV charging solutions for a range of sectors

Humax delivers efficient EV charging solutions for a range of sectors, including residential complexes, workplaces, retail spaces, municipalities, and fleet operations.

Our systems offer reliable, scalable infrastructure tailored to meet evolving commercial needs.

Supporting both sustainability efforts and operational efficiency, Humax enables businesses to adapt to the growing demand for electric mobility.

How Humax EV partnered with Respirex to enhance sustainability while driving growth

Background

Respirex International, a leading provider of personal protective equipment partnered with Humax EV to implement a sustainable EV charging solution that would reduce its carbon footprint and encourage the use of electric vehicles by staff and visitors.

Solution design

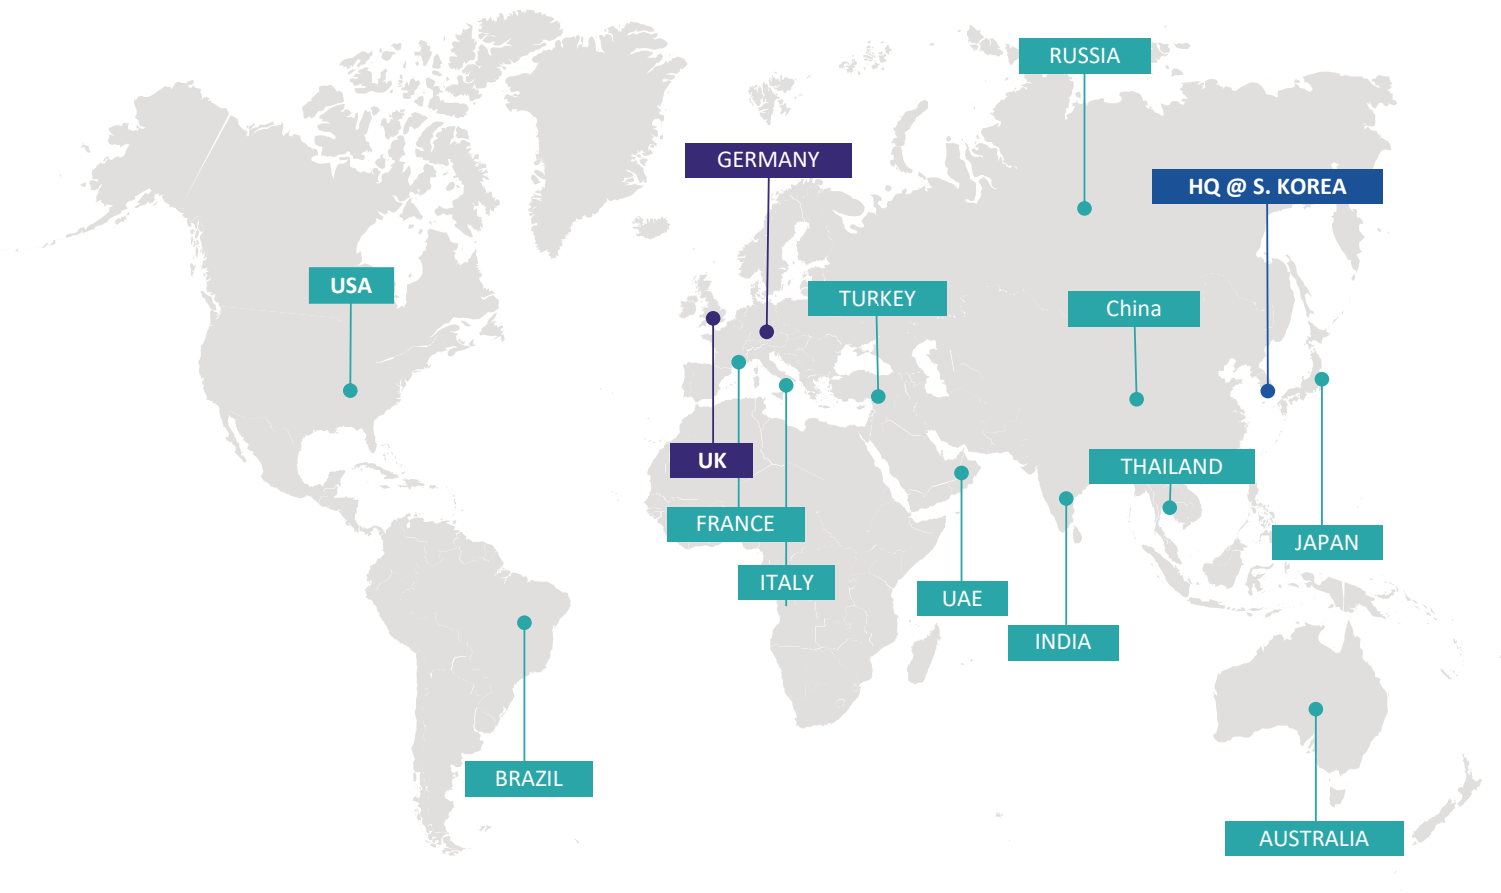

Humax EV designed and installed a network of smart commercial EV chargers. The scalable system provides efficient energy management and real-time data monitoring, enabling rapid charging and accommodating future expansion.

Commercial impact

Since the installation, EV usage among employees has risen, contributing to the company's sustainability targets. The charging stations have created a new revenue stream and enhanced Respirex's brand image. The company now benefits from a reliable, future-proof solution that aligns with its green initiatives.

Specifications

	MODEL	7kW AC	22kW AC	30kW DC	
Input	Power Supply	Single-phase	Three-phase	Three-phase	
	Rated Voltage	230V AC	400V AC	400V AC	
	Rated Current	32A	32A	45A	
	Frequency	50/60Hz	50/60Hz	50/60Hz	
Output	Output Voltage	230V AC	400V AC	150 - 1000V DC	
	Maximum Current	32A	32A	75A	
	Rated Power	7kW	22kW	30kW	
User Interface	Housing Material	Plastic PC940	Galvanized Steel	Galvanized steel housing and Tempered glass screen	
	Charge Connector	Type 2 Socket		CCS2	
	LED Indicator	Green/Yellow/Red			
	RFID Reader	Mifare ISO/IEC 14443 A			
	Start Mode	Plug&Play/RFID card/App/QR Code			
Communication	Communication	Wi-Fi and Ethernet. Optional: 4G			
	Protocol	OCPP 1.6Json			
Safety	Energy Meter	MID Certified			
	RCD/RCBO	Built in 6mA DC protection, Type A RCBO with 30mA earth leakage protection and 40A current rating		N/A	
	Ingress Protection	IP54			
	Impact Protection	IK08			
	Electrical Protection	Over current protection, Residual current protection, Surge protection, Over/Under voltage protection, Over/Under frequency protection, Over temperature protection, PEN Fault Protection			
	Certification and Standard	CE/CB EN/IEC 61851-1: 2019, EN/IEC 61851-21-2: 2018, EN/IEC 61000-6-1:2019, EN/IEC 61000-6-2:2019, EN/IEC 61000-6-4:2019.
